WEDO Alberta Presents:

Woman's Entrepreneurship Day 2020

#ChooseWomen

#WEDO2020

The COVID-19 crisis has caused a dramatic shift in Alberta's business landscape, creating a new urgency for supporting our province's growing numbers of women entrepreneurs. This November 19th, the Alberta division of the global Women's Entrepreneurship Day Organization is hosting an innovative virtual conference that will demonstrate the power of technology to help female business leaders move forward in these challenging times, while providing insights from expert speakers and panelists on the future evolution of our changing economy.

Bringing together women leaders in sectors like technology, finance and core industries like energy, Alberta's Women's Entrepreneurship Day celebration features panel discussions including:

- Technology's Role in Driving Post-Pandemic Business Transformation
- Business Growth and Opportunities in a Post-COVID-19 Alberta
- Lessons in Entrepreneurship from Alberta's Female Business Leaders

**ALBERTA**

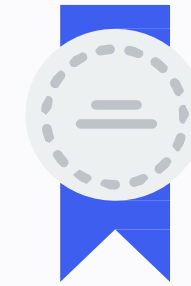

Unlike any other conference

Through an interactive event format and opportunities to build connections with other female entrepreneurs through creative virtual networking, WEDO Alberta's goal is to use innovative technologies to support a new unity in our province's community of female business leaders.

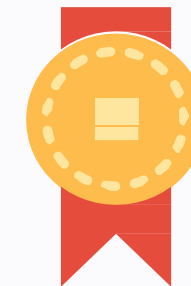

With the highest number of women-led companies in Canada, Alberta has an incredible amount to celebrate, and the lessons we take from our past successes will help show our path towards the economic opportunities of the future. Join our virtual conference on November 19th to be inspired, informed and help WEDO Alberta reimagine what success means for women during the next chapter of our province's economy.
